

**AngelTech**

# About Us.

AngelTech is a software development and digital innovation company dedicated to helping businesses and organizations grow through technology.

We specialize in designing, developing, and maintaining websites, mobile applications, and custom software solutions that make operations smoother, faster, and more profitable.

Our mission is to empower entrepreneurs, SMEs, and organizations with affordable, reliable, and modern tech solutions tailored to their unique needs.

## What We Offer.

We build technology that works for your business — not the other way around.

- **Web Development** – Business websites, e-commerce stores, and portfolio sites.
- **Mobile App Development** – Android & iOS apps for customers or internal use.
- **Custom Software Solutions** – ERP systems, inventory management, CRM tools.

- **Cloud & Backend Development** – Secure, scalable systems and server management.
- **System Maintenance & Support** – Continuous updates, monitoring, and improvement.
- **IT Consultation & Automation** – Advising businesses on digital transformation.

- **E-commerce & Payment Integration** – Seamless online stores with secure payments.
- **UI/UX Design** – Beautiful, intuitive, and user-friendly digital experiences.

# Our Solutions.

We don't just write code — we solve real business challenges.

01

Businesses struggle to reach online customers.

We build websites and apps that bring your business online and attract more clients.

02

Manual work wastes time and causes errors.

We develop software to automate tasks like sales tracking, bookings and inventory.

03

Small businesses find tech expensive or confusing.

We offer affordable, easy-to-use digital solutions built around your needs.

04

Startups need working products fast.

We build MVPs (Minimum Viable Products) quickly so founders can pitch to investors.

05

NGOs and schools lack digital management systems.

We create systems to manage records, donations, students, or events efficiently.

06

Businesses lose customers due to poor online experience.

We design modern, responsive, and fast websites that keep users engaged.

# ***Our Target Clients.***

*Small & Medium  
Businesses  
(SMEs)*

*Entrepreneurs  
&  
Businesses*

*Schools, NGOs
